SUMMARY

2 Year Experienced Front-End Engineer with expertise in Angular, TypeScript, and building user-focused, scalable, data-driven applications. Worked on 10 admin-side and 3 client-side applications for Aldagi and its subsidiary companies, improving and creating new UIs using Angular Material, Bootstrap, and Tailwind. Also responsible for fixing bugs, creating entirely new projects, and deploying them to production. Committed to building intuitive data visualizations that enhance decision-making for large-scale clients.

SKILLS & TECHNOLOGIES

Angular, TypeScript, JavaScript, RxJS, NgRX, RESTful API, Git, CI/CD, HTML, CSS, SCSS, Angular Material, UX/UI, Figma, Responsive Design, SCRUM, Kanban, and Agile methodologies, Problem Solving, Concurrency, Teamwork.

WORK EXPERIENCE

Aldagi Front-End Angular Developer	2023 - Present fulltime
--	----------------------------

- Developed multiple modules for Greenway's admin-side application focused on technical inspections, including a full CRUD system for managing vehicle data used by organizational staff.
- Built a dynamic vehicle insurance calculator interface, including editable tables for updating related data, enhancing usability for internal users.
- Designed and implemented a complete real estate insurance calculator as a standalone Angular application, from initial setup to final delivery.
- Led the frontend development of Aldagi's commission calculator, enabling staff to calculate individual commission breakdowns with improved accuracy and speed.
- Created user-friendly and responsive UI visuals for all client-side applications, ensuring consistency and alignment with design guidelines.
- Developed and integrated a reusable refresh token service in each application to ensure secure and seamless user authentication.
- Customized and styled Keycloak themes to align with the branding and user experience standards across all company projects.
- Collaborated closely with backend developers, UI/UX designers, and QA engineers to deliver reliable, high-quality features on time.
- Contributed to project planning and iteration cycles in an Agile environment using SCRUM and Kanban methodologies.

Technologies I used:

Angular, TypeScript, RxJS, RESTful API, Git, CI/CD, HTML, CSS, SCSS, Angular Material, Keycloak

CLIENT-SIDE PROJECTS

- travel.aldagi.ge
- onlinemezobloba.aldagi.ge
- onlinetravel.aldagi.ge

LANGUAGES

- English (Advanced)
- Russian (Advanced)
- Georgian (Distinguished)
- Greece (Novice)

EDUCATION

Business and Technology University (BTU) Bachelor's degree Informational technologies	2020-2024
